

Distributed Team Student CV

Name: Silvana Melissa do Cabo Guedes, I prefer to be called: Silvana

E-mail: silvanacabo_guedes@hotmail.com

University: Universidade de Trás-os-Montes e Alto Douro, Portugal

Personal Goals and Interests

My interests are mostly in the area of biomedical engineering, from the development of medical devices, the development of medical image analysis software, apps that facilitate the interaction between the doctor and patient, or apps that help in the diagnosis of diseases. With this job my main objectives are to gain experience working in a large group, learn new concepts, and get out of my comfort zone.

Skills (rating: 0 = none, 5 = most experience)

Languages: 0 Java 0 C 0 C++ 2 Python 0 JavaScript 4 Matlab

Platform: 5 Windows, 5 iOS, 5 Android

Other: 0 Version Control (Git, SVN, etc.) 0 Data Base (SQL, MongoDB, etc.)

4 Written English 3 Spoken English Other Languages:

Positions Wanted

Choose all of interest: 0 = no interested, 5 = most interested

Roles: 1 Project Manager 3 Requirements Analyst 1 System Architect

0 Developer 5 Tester

Work Assignments of Interest

Refer to the Concept of Operations for a description of the application and subsystems. Please indicate which you are interested in working on (0=not interested, 5=most interested).

3 Android App 2 Database 1 Server

5 "AI" module 4 Web Page

Other Skills or Experience

My degree is in biomedical engineering and my master's is in the same area. During these years, the most relevant experiences that can help in the development of this work are, my final degree project "Intelligent segmentation of ultrasound images" and the development of a web app using the low-code development platform *Outsystems*.
